Control Access

Control who accesses your HR data with hh2 Human Resources. Give your field managers access to data that is available instantly on the jobsite with the Job/Crew Dashboard. Provide your employees with access to paystubs, emergency contacts, benefits information and a host of additional HR data with My Records.

Manage Like A Pro

Quickly manage and roll out vital HR data for your entire organization with Enterprise Management. In a few clicks, you can view and adjust reports for classifications, certifications, and benefits for all of your employees.

My Records

Give your employees access to their important HR information with hh2 My Records. Employees can quickly view pay stubs and company documents on-the-go. They can review their certifications, check on sick and vacation time, and look over their benefits packages. Your employees can use their desktop browsers or access information using hh2's apps developed natively for iOS and Android devices.

Documents in the Cloud

Store and roll out a wide variety of important HR documents on an employee level or send them to every employee throughout your organization with the Document Library.

Provide quick access to employees and managers for documentation like employee resumes, offer letters and license information. Roll out documents on a global level with newsletters, important benefit information and other vital HR documentation.
